

# Keefe Intermodal – Port of Thunder Bay

Keefe intermodal is Northwestern Ontario's largest warehousing facility. They have recently expanded their facility to include a 5,300 square metre (57,000 square feet) clear span building, which features heating, reinforced concrete floors, with a high density fire protection sprinkler system. They also provide indoor / outdoor rail which is connected to both the CN and CP railways, access to the Trans-Canada Highway and Highway 61 south to the U.S.A., state of the art docking facilities as well as an emergency dispatch and monitoring system for your security needs.

There are several services available to the clients and they include: on-site maintenance, logistical support, intermodal support and scheduled security patrols. The new facility is available for long or short term leasing.
