

The time is right...

Imagine...

a much larger Marina Park.
a village on the edge of the Park.
the Park alive with people and activity of all kinds.

Imagine Prince Arthur's Landing at Marina Park.

Perspective View of Marina

How is Prince Arthur's Landing at Marina Park consistent with the Vision for the 52 kilometres?

The Prince Arthur's Landing at Marina Park Master Plan is the first big step toward making our Waterfront a year-round destination that's connected and ours to celebrate.

Prince Arthur's Landing at Marina Park provides the first opportunity to link the Waterfront with our neighbourhoods. The mixed uses will create an intensity of use that will make the waterfront an exciting and dynamic destination for residents and visitors.

It's in the detailed design that Prince Arthur's Landing at Marina Park will truly become **Ours to Celebrate**. As the Landing is designed and built, we will tell our stories using local art, crafts, imagery and materials. It will connect our past and future and celebrate the immense power of the landscape.

“Mixed use is key to creating public spaces where people want to be.”

Market Square Sketch

Public Access to Pier 2

The proposed Master Plan and Urban Design Guidelines for Prince Arthur's Landing at Marina Park are the result of an extensive public engagement process and were developed and approved by your Waterfront Development Committee.
