

# Committee of Adjustment

## MINOR VARIANCE & PERMISSION

### INFORMATION/GUIDELINE

Development & Emergency  
Services Department

---

*The following is preliminary information only*

### **What is Committee of Adjustment?**

The Committee of Adjustment is comprised of Thunder Bay citizen members, appointed by Council, and given authority for certain approvals and/or permissions in accordance with the Planning Act. These approvals and/or permissions relate to minor changes to zoning regulations and permissions related to legal-non conforming uses. The Committee also grants consents (land severances) to sever a parcel of land into more than one lot, or as an addition to abutting properties (boundary adjustment).

### **What is a Minor Variance?**

A Minor Variance is a small change to requirements of the Zoning By-law regulations and includes, for example: reduced setbacks, lot frontage, lot depth or lot area, and/or increases in lot coverage or buildings heights. It is important to note that the Committee does not deal with variances to land use nor does it change the zoning of the property, but rather allows some relief for a specific requirement from the By-law necessary to obtain a building permit.

### **Review of Applications**

When reviewing Minor Variance Applications, the Committee of Adjustment must be satisfied that the following tests prescribed in the Planning Act have been met:

- The variance is minor in nature;
- The variance is desirable for the appropriate development or use of the property;
- The general intent and purpose of the Zoning By-law is maintained;
- The general intent and purpose of the Official Plan is maintained.

Consideration is also given to the nature of the proposed change, the suitability of the land for the proposed use, vehicle access, water supply, sewage disposal, the design of structures, heritage conservation issues, tree preservation, parking layout, grading, drainage, and public input.

### **Legal Non-Conforming Permission Applications**

Permission for enlargements or extensions to structures that are Legal Non-Conforming, and changing a Legal Non-Conforming use to another use not permitted in the Zoning By-law, requires an application for permission.

A Legal Non-Conforming use exists when zoning for the subject land does not permit its current use, but the use was permitted and lawfully in existence before the enactment of the current Zoning By-law. The Committee of Adjustment can consider applications for permission to:

- Enlarge or extend structures that are Legal Non-Conforming
- Change a Legal Non-Conforming use to another use not permitted in the Zoning By-law

In either application, it must be demonstrated that the current use has been continuous since the time of its prohibition in the Zoning By-law. Applicants are advised to contact City staff to determine if the use qualifies as a Legal Non-Conforming use, by obtaining a Property Information Report (Compliance Report).

## **How to Start?**

Before you make a Minor Variance application, it is recommended that you to consult with the Planning Services Division staff. Staff will be able to explain the process, outline the submission requirements, and list any other applicable permits and approvals that may be required. A scheduled appointment is suggested for inquiries at (807) 625-2538.

## **Minor Variance Application Requirements**

- 1) Completed Application Form (available at the Planning Services Division or online at [www.thunderbay.ca](http://www.thunderbay.ca))
- 2) Site Plan (8.5" x 11")
- 3) Application Fees

## **Application Fees**

Fees are outlined on the application form and are to be paid at the time an application is submitted

## **Submission of a Complete Application**

The application form sets out the information that must be provided by the applicant, as prescribed in the schedules to Ontario Regulation 200/96 made under the *Planning Act*. The City of Thunder Bay will consider the application to be 'complete' when all information and prescribed fee is submitted. The submission of an incomplete application may result in delays in the processing of the application. If any required supporting material (including necessary reports, sketches, plans and fees) is not provided, the City will return the application or withhold its processing until the supporting material has been provided.

## **Specialized Studies**

The City may require additional information to ensure conformity with provincial and other regulatory documents. This requirement may be determined based on the location of proposed development, or following a site inspection whereby potential hazards or conditions that require further consideration have been identified. Specialized Studies may include: Environmental Impact Study, Land Use Compatibility Study, Hydrological and/or Geotechnical Assessment, Traffic Assessment, Noise Impact Study, Lake Impact Study, Heritage Impact Study, Archaeological Assessment Report, or other study deemed necessary to demonstrate that the proposal will not negatively impact the public or the natural/built environment.

## **Committee of Adjustment Decision**

Any person or public body has the right to appeal the Committee's decision to the Local Planning Appeal Tribunal (LPAT). The appeal must be filed with the Secretary-Treasurer of the Committee of Adjustment within 20 days of the date of the decision being made. If an appeal is received, the entire matter is forwarded to the LPAT, and the LPAT will arrange a new hearing. The decision of the LPAT is considered final. At the end of the 20-day appeal period, if there has been no appeal filed, the Committee's decision will become final and a notice to this effect will be issued. The Committee of Adjustment is authorized to impose conditions on the decision. All conditions imposed by the Committee must be fulfilled to complete the process.
