

**Series 108 - Fort William Local Improvement Distribution Fort William Fonds**

---

1910-1930

58 cm. of textual records (2 v.)

---

Local improvements to conduct work on streets, sewers, watermains and curbs were managed as directed in procedural By-law 1121 of 1911. While the Local Improvement Registers (Series 106) and the Local Improvement Assessment records (Series 80) outline the funding for improvements through taxpayer's levy payments or Municipal contributions, the Local Improvement Distribution consists of a payment ledger for expenditures on each improvement.

Arranged by year, the records include the date, the names of individuals or companies who conducted the work or supplied a service, the particulars of payment, the cheque or voucher number, the amount paid, and the designation as to the completed street repair or improvement.
