

1962-1970

44 cm. of textual records

---

These scrapbooks of newspaper clippings relating to City issues and events were maintained in the City Engineer's Office.

The series consists of five volumes of newspaper clippings arranged chronologically. Researchers would need to know the approximate date of the event or issue they were researching to determine if any relevant articles had been kept.

The articles cover a wide range of issues and events, including visits to the City by various dignitaries, tender advertisements, by-laws which were required to be published, job advertisements, taxes, facility openings, including Keefer Terminal and Volunteer Pool in 1962 and Trowbridge Campgrounds in 1964, street paving and sidewalk notices, retirements of City Officials, Centennial Celebrations, urban renewal, elections and amalgamation.
