

Series 403 - Engineering Studies and Consultants' Reports Thunder Bay Fonds

1909-2008

5 m., 40 cm.

Contains reports and studies prepared primarily by consultants for Engineering Division and other City departments related to a variety of projects. Topics include traffic, water treatment, landfills, soil quality, and urban planning, among others. Most reports are post-1970 but the series also includes reports prepared for the former Cities of Fort William and Port Arthur.

Reports were stored in the Engineering Library, and transferred under TW051 when they were deemed no longer regularly required.

Most are spiral-bound reports.

By year. Arrangement performed by Archives staff as reports arrived in no discernable order.

A

File list available.

Further accruals expected.

Although series is fully accessible, copyright for some materials may reside with the consultant rather than with the City of Thunder Bay.
