

1960-1969

6 rolls of microfilm

---

Through the passage of By-Laws, the Town and City of Port Arthur appointed Plumbing Inspectors. Duties of plumbing inspectors included the issuing of permits for construction and repairs to plumbing and drainage systems. In 1938, By-Law 2237 which regulated plumbing work and the sanitary conditions of buildings was passed. This By-law repealed all previous plumbing by-laws, but amendments to it were later made as well.

This series consists of 6 rolls of microfilmed plumbing permit applications. Some of the following details may be included in these applications: application number, location of property, including the legal description, owner, address, architect, builder and address, new or old building, purpose of building, accompanying plans, location of water closets, kitchen sinks, stop sinks, baths, basins, urinals, wash tubs, other fixtures, description of main soil, waste and vent pipes and stacks, size of house drain, number of water closets or urinal compartments, ventilation and lighting of same, water closets or urinals to be erected in cellar or basement, construction of floor or cellar basement, fees, house sewer connection number, dates of inspection, remarks and final inspection.

Transferred to the City Archives from the Building Department and stored by Archives for a number of years before accessioning.

City of Thunder Bay Plumbing Permits for the years 1970 up to and including May 1971 are included on microfilm roll #6.
