

WE COUNT ON YOUR WATER METER READING EVERY THREE MONTHS

Customers without an outside remote are responsible to submit meter readings every three months between the 1st and the 21st.

Every water bill you receive indicates the month that we require your next meter reading. Please look for the "IMPORTANT NOTICE" section on your quarterly water bill.

Set up reminders by text, phone or email for your readings and bill due dates. Go to thunderbay.ca/remindme

EASY STEPS TO SUBMIT YOUR WATER METER READING

1 Have Your 8 Digit Water Account Number

as it appears on your Water Bill

2 Read your Water Meter

Read your water meter from left to right and enter ALL digits on your meter (including zeros and decimal numbers).

3 Submit Your Meter Reading

Call 625-3160 (24 hr. service) to enter your water reading using your touch tone phone.

Enter your reading online: thunderbay.ca/waterbilling
Select Meter Reading

Text your reading using your smartphone, text "Hello" to 807-788-1227.

Call us at 625-2255 during regular business hours if you require assistance, or you have a final reading due to a move.

REMOTE READOUT DEVICE OPTION

Upon request, remote readout devices can be installed by the City at the homeowner's expense. If you have a remote readout device the Water Meter Inspector will attempt to read your meter every three months from the outside of your home. For more information contact the Environment Division at 474-4817.

WATER RATES

Our water rates have been designed to be equitable, easy to understand and benefit those who conserve.

Effective April 1, 2022, Sewer and Water rates are as follows:

For single family detached and semi-detached residential buildings that are individually metered:

- **Fixed cost** = \$0.862 per day (\$315 per year)
- **Volumetric charge** = \$1.887 per cubic metre
- **Sewer rate** = 90% of total fixed and volumetric charges

For the average household that consumes 200 cubic metres of water per year the 2021 total cost for water was \$1,277. For 2022 the cost will be \$1,315, an increase of 3.0% or about \$9.50 for each quarterly bill.

For all other customers (including duplexes on single meters, commercial and industrial properties):

- **Fixed cost is based on meter size** (see thunderbay.ca/waterbilling for details)
- **Volumetric charge** = \$1.163 per cubic metre
- **Sewer rate** = 90% of total fixed and volumetric charges

Water rate increases for the three months that end April 30 and May 31, will be phased in to reflect the portions of the billing at the old and new rates.

For answers to frequently asked questions about water bills, purchasing or selling your home, a detailed list of rates and fees, a change of address form, or to use the online water bill estimator for single family households, visit thunderbay.ca/waterbilling or call us at 625-2255.

DON'T LET YOUR MONEY LEAK AWAY

Leaking Toilets

Here are two easy tests to tell if your toilet is leaking.

1. Remove your toilet tank lid. Put a few drops of food colouring into the toilet tank and wait 30 minutes.

Look in the toilet bowl, if the water changes colour, you have a leak.

2. Look inside the tank, if the water is flowing into the overflow tube once the tank is full, you have a leak.

A leaking toilet can waste 100's of cubic metres a month and is the number one cause of high water bills.

Leaking Faucets

Unlike a leaky toilet, a leaky faucet is easy to notice because of the sound of dripping water.

Take a walk through your home to check for leaking faucets.

A leaky faucet that drips at a rate of one drip per second can waste more than 14 cubic metres per year.

MONITOR YOUR WATER USE

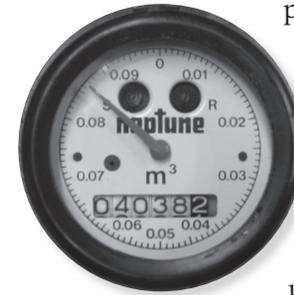

Detect Hidden Leaks

Here is an easy test to detect hidden leaks.

Take a reading after the last person has used water at night (write down all the digits).

Take a second reading in the morning before anyone uses water.

If no one used water overnight and the reading has changed, then you know you have a leak.

Know Your Daily Average Water Use

Read your meter often so you are aware of your average daily use and detect leaks early.

Question an increase in your daily average. You may have a leak or a change in consumption patterns.

An average household consumes .55 cubic metres a day (120 gallons), which is 50 cubic metres in a three month billing period.

220 gallons = 1,000 litres = 1 cubic metre
