

# Coffee Filter Tie-Dye!

follow these simple steps for a fun craft!

**You will need coffee filters, markers, straws and water!**

## **Instructions:**

- **Decorate your coffee filter with marker in whatever design and colours you wish**
- **Once decorating is complete, use a straw to drip water on the coffee filter to create a tie dye effect (put straw in water, cover top with thumb, carry over and lift thumb).**
- **Let dry!**

To create even MORE, scrunch up tie dye filters into a clothes pin to make a butterfly! You can also add antennas using pipe cleaners or misc. items, and hang up around the house!
