tebuconazole	To control snow mold	NA	1.800	A new product was used to treat tees and approaches

for the year 2019

Golf Course: Chapples Golf Course

Please upload map(s) of the golf course showing the locations where Class 9 pesticides were applied, and identify use by Class 9 pesticide ingredient or by product type (fungicide, insecticide, herbicide, growth regulator)

Please explain how practicing integrated pest management (IPM) and maintaining IPM accreditation with the IPM Council of Canada minimized the use of pest control products on your golf course and how it will minimize use in this current calendar year.

Better cultural practices are being used. Focus to insure plant health is strong, making our turf more resistant to pest problems and exceeding thresholds. Also, a better awareness of AI rates to ensure that over treatment and possible resistance to chemicals is not occurring.

We, the undersigned, attest that the above information is accurate and inclusive of all pesticide products applied on our golf course for the entire year. We are aware that it is an offence under the Pesticides Act: 17(6) to include false or misleading information in any document or data required to be created, stored or submitted under the Act.
